

NEW AAS WINNERS

Patio Choice Yellow F1

Chef's Choice Yellow F1

Squash Honeybaby

Pea Patio Pride

This AAS Winner produces very large yields of 1/2 ounce bright yellow cherry tomatoes on short vines that grow only 18 inches tall. This mild flavored cherry tomato sets over 100 fruit on compact plants which are perfect for small space food gardeners as well as urban and container gardens. Consider using these beautiful tomatoes either fresh, in the oven or sun dried for a deliciously sweet treat. For even easier picking, plant in a hanging basket.

Produces hearty beefsteak type tomatoes in a beautiful yellow color. This large meaty delicacy has a sweet, citrus-like flavor with just the right amount of acid and the perfect tomato texture. AAS judges raved about the quantity of the 10-ounce fruits that each 5- foot indeterminate vines produced. You'll enjoy harvesting 30 or more fruits throughout the season from this disease resistant plant. You'll be the envy of all your tomato-growing friends.

Winter squash producing numerous fruits on a compact plant. These shorter vines grow 2-3 feet in a semi-bush habit. Healthy plants resists powdery mildew later into the season, especially in the Southeast. Short, wide fruits are slightly larger, sweet and nutty and more meaty than similar varieties. Delicious when steamed, baked or made into soups and stews. Plant as soon as soil temperatures reach 65 degrees to ensure maturity in 90-100 days.

Produces sweet, uniform pods that are very tender when harvested early. Only 40 days needed to maturity. This pea is wonderful when planted in containers and is ideal for succession planting yielding a consistent harvest over many weeks. Plant in patio containers with cool season flowers for a beautiful combination ornamental and edible display. Direct seeding is recommended; seed 3-4 seeds every 6 inches then thin to one seedling every 6-8 inches.

Winter Squash Sugaretti F1

Pumpkin Pepitas F1

Pumpkin Super Moon F1

Pepper Black Hawk F1

Sugaretti is a spaghetti winter squash that prolifically produces a generous crop of mid-sized orange fleshed vegetables. These striped beauties are a great tasting, healthy fall treat on semi-bushy vines that spread only about two feet. The nutty sweet flesh can be used as a pasta substitute as well as for simple roasting or blended in soups. Good disease resistance to powdery mildew. Sugaretti produces so many fruits that it's good their hard shells protect the flesh for a longer shelf life.

AAS selection Winner in both the decorative and culinary arenas. Pepitas is named for its hullless or naked seeds that lack the tough outer hull. Eat either fresh or roasted. Pepitas are a delicious and nutritious treat, with many health benefits! Each high yield plant produces numerous 9 – 12 lb pumpkins on healthy, disease resistant vines. Produces beautiful orange fruits that at maturity have decorative green stripes. What an interesting change of pace for your fall decorations.

First-ever white pumpkin AAS Regional Winner. Our judges loved the eye-appealing ghostly white coloration on the large, blemish-free round pumpkins. Grown for their size, up to 50 lbs, and their clean white color, these hardy plants are known for their early fruit development and vigorous growth. Their stems are tough, hardy, disease-resistant and unstoppable! When done decorating with these beauties, consider trying the yellow flesh for roasting or in your fall harvest soups.

Adorable little ornamental peppers that start off black and change to a beautiful, head-turning red. Our newest AAS Regional Winner, Black Hawk F1. A very early flower and fruit producer that keeps up production through fall. The consistent plant habit and well branched fullness of the dark green, purple black foliage make it an excellent addition to any mixed container, flower bed or cut flower design. The red conical shaped fruit are edible but not recommended as they are very spicy.

Growers on the cutting edge of today's market trends ask for **Seeds by Design** when looking for Organic, Heirloom or Hybrid vegetable seeds, for commercial growers and the home garden trade.
