Pea Patio Pride
AAS 2017 Edible Winner
Regional Winner - Southeast

This compact beauty produces sweet, uniform pods that are very tender when harvested early. With only 40 days needed to maturity, Patio Pride can be one of your first spring harvests, or one of the last fall harvests from your Southeastern garden! This pea is wonderful when planted in containers and is ideal for succession planting yielding a consistent harvest over many weeks. Plant in patio containers with cool season flowers for a beautiful combination ornamental and edible display. Direct seeding is recommended; seed 3-4 seeds every 6 inches then thin to one seedling every 6-8 inches.

Bred by Terra Organics

Closest comparisons on market: Tom Thumb, Avalanche

All-America Selections® was founded in 1932 and continues as the oldest independent testing organization in North America. Every year, new, never-before-sold in North America varieties are trialed in our Trial Grounds and professional horticulturists determine which varieties will be deemed winners based on their garden performance. AAS relies upon a public relations program to inform gardeners about AAS Winners that are announced three times each year.
