

Seeds by Design: The name says it all... we are the first production company in the US to offer such a diverse line of vegetable and herb seeds from heirlooms to hybrids; suited for the commercial grower to the home garden trade. We offer more heirloom varieties than any other production company as well as our own line of hybrids, including peppers, tomatoes, and vine seeds.

Lettuce Lolita

30 days baby, 53 days to full maturity. Dark Lolla Rossa type, with heavily frilled intense burgundy leaves. Heads form five to seven inch circular mounds, more compact and slower to bolt than other Lolla Rossa types, excellent for adding texture and color to any salad mix.

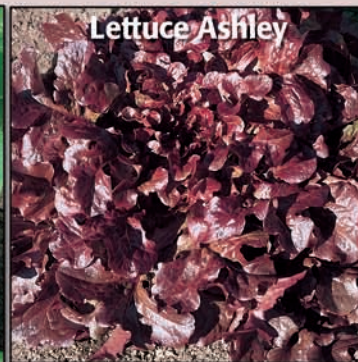

Lettuce Gabriella

25 days baby, 50 days to full maturity. Triple red upright leaf variety. Gabriella is a deep wine red even as it emerges, this feature makes it very desirable for baby leaf production. Lovely bunched variety as well.

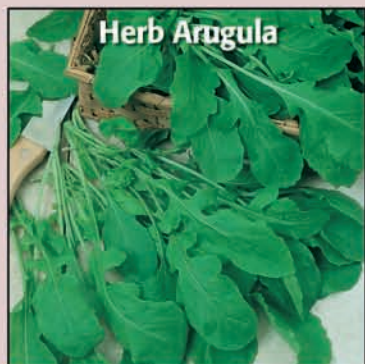

Lettuce Vivian

28 days baby, 50 days to full maturity. Vivian is a tightly bunched romaine, twelve to sixteen inch long leaves. Heads are four to six inches across with broad, dark green, crisp leaves, bolt resistant, suitable for commercial growers. Erect dark glossy green leaves are great for baby leaf production as well.

Lettuce Ashley

25 days baby, 50 days to full maturity. One of the deepest colored wine red oakleaf. Highly rated red color for baby leaf mixes. Leaf color is clearly more intense red than other red oakleaf types. Heads are full and can also be bunched.

Herb Arugula

15 days baby, 30 days to full maturity. Slow bolting annual, eight to ten inches tall. Stalks and lobed leaves have mild nutty flavor. Standard variety for bunching, baby leaf or braising mixes.

Mustard Red Giant

21 days baby, 45 days to full maturity. Japanese mustard with large thick, tender, deep purplish red, savoyed leaves with white mid ribs. Strong mustard flavor, good when pickled, very slow to bolt, winter hardy annual. Red Mustard is used for bunching, micro and salad greens.

Mustard Mizuna

20 days baby 40 days to full maturity. Another standard variety used for bunching, micro and salad greens. Dozens of pencil thin white stalks, deeply cut fringed leaves, with mild mustard flavor. Plants will regrow after cutting, very productive variety.

Swiss Chard Ruby

30 days baby, 60 days to full maturity. Plants have deep crimson stalks and leaf veins, contrasting glossy dark green heavily savoyed leaves. Cook stalks like asparagus and leaves like spinach, both leaves and stalks can be used raw, unique mild flavor. Ruby chard can also be used as an attractive ornamental.

Terra Organics: The sister company to Seeds by Design, Terra Organics was the first full scale production company to offer a complete line of organically produced vegetable and herb seeds. If your grower wants it organically, we probably have it. From baby leaf to heirlooms and all varieties in between, Terra Organics is the place to go for Organic seed.

Growers on the cutting edge of today's market trends ask for Seeds by Design and Terra Organics when looking for Organic, Heirloom or Hybrid vegetable seeds.
