CUCUMBERS

Green Dragon F1

Green Dragon F1

Our newest hybrid sweet burpless cucumber is long, and never bitter. This dark green slicer has very few spines, the smooth fruit are eight to ten inches long and matures in fifty-five days from sowing. Green Dragon has multiple disease resistance.

Suyo Long

Suyo Long

Asian cucumber prized for its crisp flesh and flavor. Fruit grow ten to twelve inches and are glossy dark green with very few small white spines. Vigorous plants can be staked to save space and keep cucumbers straight.

Garden Sweet Burpless F1

Garden Sweet Burpless F1

Long cylindrical burpless slicer with faint striping on the neck ends. Fruit grow to ten to twelve inches, bitter free, and smooth. High yielding vines make this a great variety for home gardeners.

Early Spring Burpless F1

Early Spring Burpless F1

Matures in 58 days. Early Spring Burpless vines grow ten to eleven inch, pale green fruit, straight when staked, an excellent home garden variety. Fruit are smooth and white spined.

Hartley F1

Hartley F1

Adaptable for both hot and cool climates. Dark green slicer with very few white spines. Very disease resistant vines produce six to seven inch smooth tasty cucumbers. Fruit are slightly tapered with slight striping on blossom end.

Calypso F1

Calypso F1

Vigorous plants, widely adaptable, fruits have white spines and medium green skin color. This commercial variety can be harvested by hand or mechanically, very disease resistant and dependable.

White Wonder

White Wonder

Novelty ivory white fruits even when mature, cylindrical with rounded ends. Seven to nine inch fruits have very good eating quality, ideal for pickles or slicing. Highly productive even in hot weather, crisp firm flesh with mild flavor, vigorous vines.

Lemon

Lemon

Two to three inch heirloom fruits ripen to bright yellow just like a lemon. Sweet white flesh is easy to digest and very tasty even when pickled with fully mature seeds. Can be used for novelty pickles or sliced and used fresh. Vigorous vines are drought and rust resistant.

Armenian

Armenian

Light green almost white ribbed fruit that grow up to two feet long. Best eaten at twelve to eighteen inches in length, never bitter and prized for sweet flavor. Prolific setter and vigorous vines can be grown trellis or on the ground.

Spacemaster 80

Spacemaster 80

Dwarf twenty four inch bush vines produce large uniform seven to nine inch fruits. These good flavored cucumbers are never bitter and have good disease resistance. Great variety for small gardens or containers.

Homemade Pickles

Homemade Pickles

Medium green fruit range from five to six inches, small spines, crisp a good pickling variety. Plants are semi bush and maintain good production when picked regularly. Harvest small at one to two inches for baby sweet gherkins.

County Fair F1

County Fair F1

Excellent high quality pickling type, five foot plants bear an impressive amount of five to six inch fruits. These blocky dark green cucumbers are bitter free and resistant to bacterial wilt. County Fair is a great performer in Northern climates.
